

REBELLION[®]

FILM STUDIOS

Rebellion Film Studios offers a diverse collection of stages and filming spaces, cutting-edge film and TV production practices, 30 years of games production experience and two decades at the forefront in Performance Capture technology.

Rebellion Film Studios is forging new ways to tell new stories.

INTRODUCTION

Rebellion Film Studios offers one large stage and two further spaces that make up over 40,000sqft of shooting space, all housed in a building with 24-hour security.

With 36-minute train links from Paddington coming into Didcot Parkway Station a stone's throw from our studios, over 100 parking spaces on site, further tech parking and loading bays, our Film Studios are prepped to work for your production's needs.

Additionally, our studios are housed in a building with over 10,000sqft of additional workshop space and over 12,000sqft of production office space all of which can also be utilised as secondary shooting locations.

VFX

Led by specialist VFX Artists, backed by 30-years of games creation and 20 years at the forefront of Performance Capture Technology, Rebellion offers innovative VFX solutions with technical and creative expertise.

Our VFX fleet has been crafted by industry leading Visual Effects Supervisors, Artists and Developers, offering high quality VFX, CGI and animation services.

Based within our film studios, our crews come together to forge innovative VFX solutions and deliver cutting edge immersive content for Film, TV & Games.

OTHER SERVICES

VIRTUAL PRODUCTION

Virtual Production is changing the way film and television is made, and Rebellion remains at the forefront of this exciting technology that will take production values to whole new levels.

Rebellion VFX translate their extensive experience in games to film and television production, offering full pre-visualisation services and green screen, as well as a cutting-edge LED wall and advanced camera tracking systems.

As the technology develops at breakneck speed, our VP team uses game engine visualisation, virtual scenes and real-time rendering, allowing them to create worlds and tell stories in new ways.
